

HIV/AIDS Monthly Surveillance Report

June 2016

Introduction

The Centre for Population Health (CPH) of the Burnet Institute has produced this report on behalf of the Department of Health and Human Services, in cooperation with the Victorian Infectious Diseases Reference Laboratory. The department funds CPH to conduct surveillance and related research into sexually transmissible infections and blood borne viruses.

Note: The total cases reported below may not match those on the department daily reports because this report is based on the date of specimen collection whereas all daily summary reports are based on the date of notification to the department. Monthly surveillance reports are produced approximately six weeks after the end of the reporting month. Daily reports are available at www.health.vic.gov.au/infectious-diseases.
