UKRAINE

As mayor of Ukraine's capital city, I am proud of Kyiv being the first city in Eastern Europe to join the Fast Track Cities Initiative. By signing the Paris Declaration we have started a new era of partnership and mutual accountability. Together we introduced dozens of innovations.

Now the city procures plenty of services delivered by NGOs from municipal budget. HIV-related services are decentralized and available at primary health care level. To ensure more accessibility of HIV services Kyiv launched Smart City E-Health tool.

And we already see positive outcomes. AIDS-related mortality dropped. The number of people receiving HIV treatment tripled. There is a threefold increase in numbers of people on PrEP. We are accelerating towards the 90-90-90 targets, but strive for greater efficiency in the fight against HIV/AIDS. And we will continue working hard to reach more.

For me a life of each person is valuable and none of Kyiv residents will be left alone, without care and support!

Vitaliy Klitschko,
Head of the Kyiv City State Administration

Mayor of Kyiv

On 6 April 2016 the Mayor of Kyiv Vitaliy Klitschko signed the Paris Declaration.

Kyiv was the first city in Ukraine, and Eastern Europe to have joined the Global Fast Track Cities Initiative to End AIDS.

By signing the Paris Declaration Mayor Vitaliy Klitschko has sent a strong signal to other cities around the country and the region on the importance of overcoming the AIDS epidemic, as a key to the sustainable development of cities and local communities.

FAST TRACK IMPLEMENTATION TEAM

Mykola Povoroznyk

Deputy Head of the Kyiv City State Administration

Co-Chair of the Municipal Council on HIV/TB

Lada Bulakh

Head of the CO 100%LIFE Kyiv region

Co-Chair of the Municipal Council on HIV/TB

Valentyna Ginzburg

Head of the Kyiv Municipal Department of Health

Vitaliy Kazeka

14 423

People living with HIV know their status and linked to medical care

10 462

People living with HIV are receiving ART

10 028

People living with HIV, who are receiving ART and have undetectable viral load

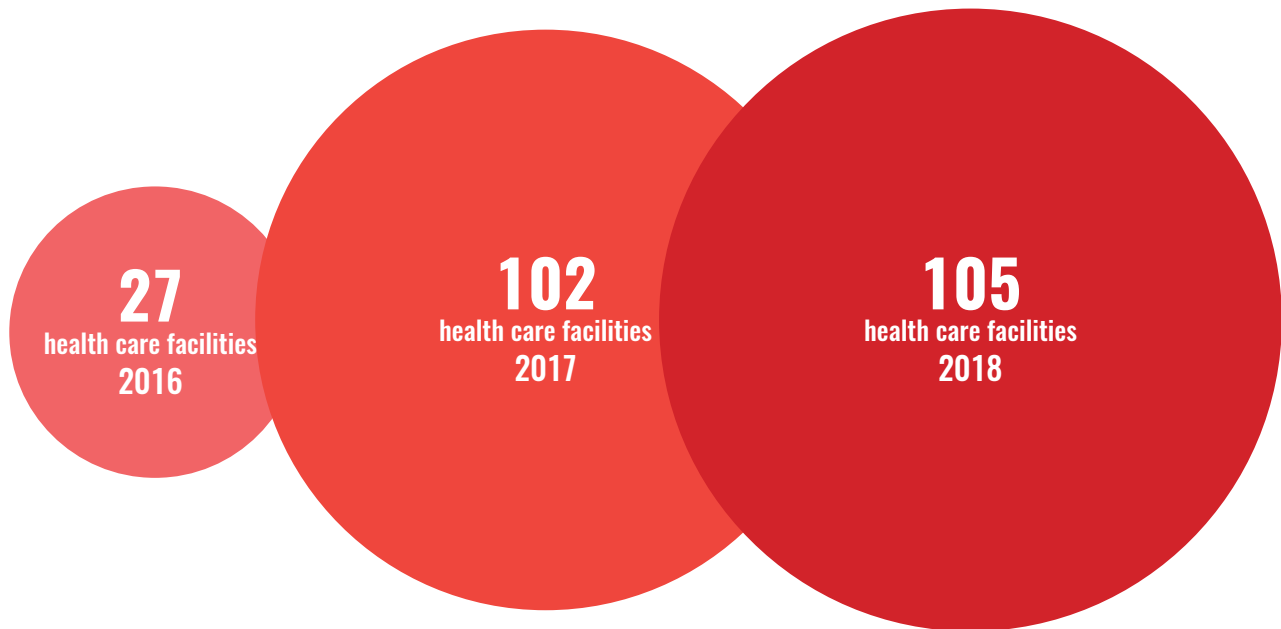

Although we observe the progress towards 90-90-90, still there are challenges in bringing people living with HIV into care. With support of PEPFAR funds Kyiv is intensifying testing and linkage to care. Index and partners' testing are to be introduced in all municipal health care facilities. Partnership with CSOs is crucial for re-engagement to care those who know their status, but missed opportunity to improve their health with ART. Treatment success is ensured with treatment innovative medicines – by the end of 2018 up to 4 thousand patient were on the regiments with DTG.

Vitaliy Kazeka,
Chief Doctor of Kyiv City AIDS Centre and Municipal Hospital #5

FOCUS ON HIV DIAGNOSTICS

In 2018 HIV rapid test for screening and diagnostics are introduced at 105 municipal health care facilities

Optimization of HIV testing strategy through introduction of rapid tests increased HIV detection rate

**Treatment acceleration needs

Smart funds allocations

- **2018 for the first time Fast Track HIV Program funded phyco-social support for OST patients**
- **Transition from ARVs provision from health care institutions to the network of municipal pharmacies has significantly saved municipal budget, as its price now is only 0.025 cents**
- **Oprimization of spending for ARVs monitoring based on latest WHO recommendations minimized number of annual CD4 tests and VL tests**
- **Procurement of the palliative care services from NGOs for people with incurable progressive diseases, including AIDS, from the municipal budget:**

2018 **409 669,92 UAH**

2019 **767 872,00 UAH**

Youth information center **Dialogue Hub established jointly by Kyiv State Administration and Olena Pinchuk Foundation in 2018 is fully operational and conducts interactive trainings on healthy life style, sexual and reproductive health, HIV prevention, and life skills for young people. The center offers HIV counseling and testing as well.**

2019 in Action

- ✓ Expanding innovations – Patients on PrEP from **125 (2018)** to **990 (2019)**
- ✓ Further ART decentralization from **28 (2018)** sites to **30 (2019)** sites
- ✓ Re-engagement to care in order to improve treatment uptake
- ✓ New OST sites from **14 (2018)** to **15 (2019)**
